

Alex Morgan

Software Engineer | Cover letter

Junior Full Stack Analyst Programmer

Southern Cross Software | Melbourne, Victoria, Australia

Dear Hiring Team,

I am interested in the Junior Full Stack Analyst Programmer role at Southern Cross Software. Your work across business-critical systems connects with my experience building accessible React interfaces and TypeScript APIs for internal business tools.

My work with SQL-backed applications and Python-based testing has helped me understand how interfaces, data and workflows fit together. I have also documented human review checkpoints for AI-assisted workflows, which aligns with your emphasis on validating development outputs.

I would welcome a conversation about how I could contribute to your team and continue developing my full stack skills. Thank you for considering my application.

Kind regards,

Alex Morgan
